

**'Postformal Education', By Dr Jennifer M. Gidley
REVIEWS by leading international education scholars**

Jennifer Gidley's masterful work develops thought about education to a new level! I'm surprised it took only ten years to write this amazing book, one that could turn thinking about education around.

- Jan D. Sinnott, PhD, Professor of Psychology, Towson University, USA.

This is the most compelling book on education I have read for many years. Gidley is one of the very rare scholars who can write intelligently and accessibly about the past, present and future in education.

- Brian J. Caldwell, former Dean of Education, University of Melbourne, Australia

This is the path-breaking book we have all been waiting for. It synthesizes the new thinking of philosophers in diverse areas of knowledge of the 20th century into a new model of integral education for a 21st century Integrative Age.

- David K. Scott, PhD, Former Chancellor, University of Massachusetts Amherst.

Jennifer Gidley is one of the most provocative and important thinkers in education today.

- Alfonso Montuori, PhD, Professor Transformative Studies Department, CIIS, USA

Brimming with profound thought, wide ranging research, an overarching spiritual vision and commitment to an educational renaissance that is desperately needed around our troubled world.

- Christopher Clouder, FRSA. CEO – European Council for Steiner Waldorf Education

Few books offer such a broad scope of transdisciplinary scholarship, nor attempt to defend an education which takes aim at 'planet-sized' problems. Postformal Education: A Philosophy for Complex Futures is such a book.

- Daniella J. Forster, *Policy Futures in Education*, 2017.

Gidley's new book is a welcome addition to existing educational literature that is focused on forward thinking, sustainability and innovation.

- Marian de Souza, *International Journal of Children's Spirituality*, 2017.

It is tremendously exciting to connect with education in this "zone" and indeed moments of deep fascination and stimulating speculations have accompanied my reading of this book. ... Altogether the ambition of this volume is enormous.

- Helen E. Lees, *Other Education - The Journal of Educational Alternatives* 2018

Gidley joins the chorus of voices calling for a planet-wide call to action to transform education and makes a distinct, inspiring, and significant contribution.

- Gabrielle Donnelly, *Journal of Transformative Education*, Vol. 15 (4), 2017.
